## FACIAL

Deep Cleansing	60 min	£40
Relaxing	60 min	£40
Oxygenating	60 min	£40
Exfoliating	60 min	£40

## MICRODERMABRASION

This deep exfoliating skin resurfacing treatment uses a highly controlled flow of fine medical grade aluminium oxide crystals to remove the dead outermost layer of skin. This process reveals the new, living skin cells that are soft smooth and receptive to nutrients.

Commonly used to treat fine lines, sun damage, black heads, acne prone skin, hyper-pigmentation and oily skin.

30-45 min Each £80 x3 £200 x6 £375

## AGERA SKIN PEELS

These revolutionary skin peels are extremely effective at treating active acne, signs of ageing and sun damage but without the normal discomfort and down time usually associated with other types of peels.

The AgeraRx peels are individually tailored to each client to stimulate the cells from deep within the skin, rather than burning off the top layers. By promoting collagen and elastin production they give a firmer smoother and more radiant appearance.

45-60 min Each £65 x3 £160 x6 £295

Microdermapeel

(Combined with Microdermabrasion) 60-75 min Each £100 x3 £250 x6 £475

## EPIONCE SKIN PEELS

The Epionce peel system is designed to gently remove the top layer of skin to effectively rejuvenate and improve appearance and maximise the health of the skin.

These peels accelerate cell turnover with minimal irritation to reveal more beautiful and radiant skin.

45-60 min Each £80 x3 £200 x6 £375

Microdermapeel

(Combined with Microdermabrasion) 60-75 min Each £120 x3 £300 x6 £540

## VISIA COMPLEXTION ANALYSIS

State-of-the-art digital photography of your face enables previously unobtainable accuracy in pre and post treatment assessment to evaluate wrinkles, spots, pores, evenness, porphyrins and UV damage. At the end of every session a personal assessment report is printed for you to keep.

Initial (2 sessions Pre and Post Treatment)	£90
Additional	£60

## ENDERMOLOGIE

Endermologie is the first FDA approved treatment for cellulite and body contouring. It is a non-surgical and non-invasive form of deep tissue massage that uses a machine to smooth the contours of the body fat.

As the viscosity of the subcutaneous fat layer decreases, blood flow and lymphatic drainage increase, facilitating the elimination of excess fluid and metabolites while improving overall cellular function.
