

# Muscle Relaxing Injections

This treatment relaxes and re educates the main muscles groups thus reducing the appearance of lines. We use BOTOX<sup>®</sup>, which is the trade name for Botulinum Toxin. It is a purified protein which is injected with a very fine needle into selected muscles. The effect is particularly pleasing in the frown and worry lines of the forehead, the laughter lines or crows' feet and in certain areas around the mouth. Discomfort is minimal and the treatment is over in a matter of minutes. Unlike surgery, BOTOX<sup>®</sup> is fast, simple, and minimally invasive, with no downtime or recovery. Most people return directly to work or normal activity following treatment. Within days, they report looking more natural and relaxed. With BOTOX<sup>®</sup>, they'll know you've done something, they just won't know what.

## Main Facial Areas

Frown Lines, Forehead Lines and Crow's Feet

## Additional Areas

Chin, Corners of Mouth, Eyebrow Lift, Nasal Bunny Lines and Vertical Lip Lines

## How much does it cost?

Women	£150	£275	£325	£25
