

Laser Hair Removal

Using the Laserscope Lyrai™ Laser System

The Epsom Skin Clinic uses the most advanced FDA cleared laser technology for permanent hair reduction, safely and effectively treating all ethnic origins and skin types including tanned skin. Dr Paul Steventon carries out a consultation before all laser hair removal treatments.

How does it work?

Laser energy is absorbed by the pigment in the hair follicle while your hair is in its anagen, or active phase of growth. The laser light is converted into heat, causing thermal damage to the follicle without harming the surrounding tissue. Hair regrowth is impeded in the damaged follicle.

How many treatments do I need?

Only 30% or less of your hair may be in the active phase at any one time depending on the body area. Thus, a series of treatments will be required to achieve the longterm improvement you desire. These treatments are spaced approximately 4 - 6 weeks apart, based on hair growth cycles. Our extensive experience tells us that you can expect to need from 3 - 8 treatments (4 - 6 is average) to each treatment area for long lasting optimal results

How long does it take?

Sessions for an upper lip or small bikini area can take as little as 15 minutes, while larger areas on back and legs may require up to 60 minutes or more. If topical anesthetic is used to numb area an additional 30 - 45 minutes will be required.

How permanent is Hair Removal?

The average patient in clinical studies sees a 48% reduction in hair growth after three treatments and up to an 80% lasting reduction after six to eight treatments (results vary). After you have completed a series of four to six treatments, any remaining hair will usually be finer and lighter in color. Most patients require one or two touchup treatments per year. Blond, platinum, most red, gray and vellus hair may respond to this treatment when using Meladine 2 - 6 weeks before treatment.

How much does it cost?

Upperlip	£50	£125	£220
Upperlip And Chin	£70	£175	£320
Chin	£50	£125	£220
Glabellar	£30	£75	£130
