

Dermal Volume Replacement & Facial Enhancement

Impressions of beauty change with time as do our faces as we age. With the range of Dermal Fillers available at the Epsom Skin Clinic, you can have a natural beauty lift with the body's own material. They are all based on a natural substance, called hyaluronic acid which is a crystal-clear, non-animal, bio-degradable gel based. The gel is injected into the skin in tiny amounts with a very fine needle. The result is instantaneous and produces a long-lasting, natural enhancement which is gentle and safe to your skin.

Shape facial contours, such as cheek bones and chin.
